G2.24 SECURITY ON SITE

G2.24.1 Security Management System

- (a) The system shall be able to perform and carry out the following tasks:
 - (i) Scanning of licenses, work permits and identity cards (NRIC), with the use of a bar code scanner. Scanner shall be triggerless omni-directional barcode system scanner with hands free adjustable stand;
 - (ii) Provision of camera interface to capture business cards, NRIC, passport and visitor's photo;
 - (iii) Automatic identification of subsequent visits where it only requires one time registration;
 - (iv) Provide speedy check in / out for registration of personnel;
 - (v) System shall be able to prompt expiry of work permit, SIC, SOC passes;
 - (vi) Able to easily and quickly generate reports showing details and movement of workers, staff and visitors into the main site and into the main plant. Report shall provide information such as numbers of staff, workers, and visitors etc. who are in the worksite and within the existing plant at any time. Reports shall be exportable into Microsoft excel and word formats;
 - (vii) Only authorised personnel are allowed access to the system for viewing, editing of information. The system shall be protected by password; and
 - (viii) The system shall be equipped with hardware with the following configuration as a minimum:
 - 1) 17inch LCD monitor;
 - 2) Intel Core 2 Duo processors with a minimum of 3.3GHz clock;
 - 3) 4GB RAM;
 - 4) Latest Windows operating system;
 - 5) 500 GB HDD;
 - 6) Wireless optical mouse;
 - 7) Wireless keyboard;
 - 8) DVD/CD RW combo drive;
 - 9) External speakers;
 - 10) Microsoft Office; and
 - 11) Network card 100Mbps.

G2.24.2 Emergency Control Plans

- (a) The Contractor shall prepare and submit for the S.O.'s approval, Emergency Control Plans (ECP), which shall describe emergency response to all potential emergency situations, including but not limited to, worker injury (including death), fire, explosion, flooding, cave-in, structure collapse, major equipment failure, fighting and mass riot.

- (b) The ECP shall provide for the evacuation of personnel from the emergency site, or the entire site, as required during emergency situations. The Contractor shall prepare contingency plans for the access of personnel and staff to and from the site in the event of a system breakdown, power failure or other unforeseen conditions. The cost for preparation of the ECP and for implementing the plan, when needed, will be deemed to be included in the rates in the Bills of Quantities.

G2.24.3 Security During Fence Breach

- (a) Where the existing security fence is required to be breached due to the Works, the Contractor shall station armed security guard(s) at areas of fence breach 24 hours per day, 7 days per week until the elimination of the security breach.
- (b) The security guard(s) shall be of Grade A category as graded by the Singapore Police Force.
